Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

Claims 2-8, 10, 12, and 14-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8. Applicant states that Claims 18 and 19 should be included with the Group 1 invention since they are directed to a syringe. Examiner agrees with Applicant. Therefore, the modified version of the prior restriction requirement is the following: Group I: Claims 1-16, 18, and 19; Group II: Claim 17. Examiner further withdraws Claims 3, 4, 5, 7, 8, 10, 12, and 14 as being drawn to a non-elected species. Specifically, Claim 3 is directed to Figure 5, a non-elected Species and Claims 4, 5, 7, 8, 10, 12, and 14 are directed to the embodiments in which the direction in which the plate member is bent is convex toward the needle. As disclosed in the specification, the elected species of Figure 14 discloses that the plate member is widthwise concaved toward the needle.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 9, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Morrison (US 5,584,818). Morrison discloses a needle-point covering member comprising a plate member (17) which can be bent, a covering portion (1) for covering the needlepoint when the bent plate member is extended, a bending-position-maintaining member for maintaining the plate member in the bent state, and a trigger-function portion (Figure 18).

Claims 1, 9, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Sweeney et al (US 5,348,544). Sweeney et al discloses a needle-point covering member (12) comprising a plate member (54) which can be bent, a covering portion (42) for covering the needlepoint when the bent plate member is extended, a bending-position-maintaining member for maintaining the plate member in the bent state, and a trigger-function portion (Figure 3).

Claims 1, 9, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Elson et al (US 5,814,018). Elson et al discloses a needle-point covering member (100) comprising a plate member (130) which can be bent, a covering portion (110) for covering the needlepoint when the bent plate member is extended, a bending-position-maintaining member for maintaining the plate member in the bent state, and a trigger-function portion (All figures).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nestell (US 5,925,020) and Noiles (US 3,840,008) both disclose a needle-point covering member.
